"EXPRESSION OF human relaxin genes: characterization of a novel alternatively-spliced human relaxin mena species.";

MOL. Cell. Endocrinol. 118.85-94(1996).

-i- FUNCTION: RELAXIN IS AN OVARIAN HORMONE THAT ACTS WITH ESTROGEN PRODUCE DILATATION OF THE BIRTH CANAL IN MANY MAMMALS. MAY BE INVOLVED IN REMODELING OF CONNECTIVE TISSUES DURING PREGNANCY. PROMOTING GROWTH OF PUBIC LIGAMENTS AND RIPENING OF THE CERVIX.

-I- SUBUNIT: HETERODIMER OF A B CHAIN AND AN A CHAIN LINKED BY TWO
                                                                                                                                                                                                                                                                                                    Pfam; PF00049; Insulin;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        EMBL; X00949; CAA25461.1;

TITLE OF INVENTION: DREPARATION OF THIS PROTEIN AND PHARMACEUTICAL
DREPARATION OF THIS PROTEIN AND PHARMACEUTICAL
                                                                                                                                                                                                                              GENERAL INFORMATION:
APPLICANT: KOMAN, Ahment
APPLICANT: CHASSIN, Dorine
APPLICANT: BELLET, Dominique
APPLICANT: BELLET, Dominique
TITLE OF INVENTION: NEW PROTEIN CALLED EPIL/PLACENTIN, PROCESS FOR THE
TITLE OF INVENTION: PREPARATION OF THIS PROTEIN AND PHARMACECTICAL
TITLE OF INVENTION: COMPOSITION CONTAINING SUCH, DNA CODING FOR SAID
TITLE OF INVENTION: PROTEIN
FILE REFERENCE: 017753-103
CURRENT APPLICATION NUMBER: US/09/174,465D
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           OTHER INFORMATION: OTHER INFORMATION:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               TYPE: PRT
